Mr. AALOKE SURIE (Founder)

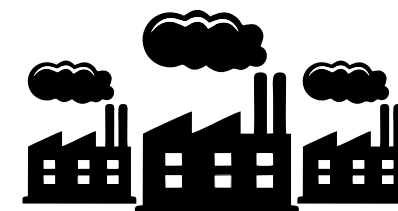

Surie Porex was established in 1985, by our Founder Mr. Aaloke Surie. He is a Mechanical Engineer trained in IIT-Mumbai and RWTH-Aachen Germany. His vision was to become the market leader and provide high quality, innovative and sustainable products that empower our customers.

Mr. SACHIN SURIE (CEO)

Mr. Sachin Surie is the Chief Executive Officer. He is a Mechanical Engineer from the Ohio State University, USA. He joined the company in 2004 and has 21 years of experience in designing, developing and manufacturing abrasives, machines and chemicals for all types of surfaces.

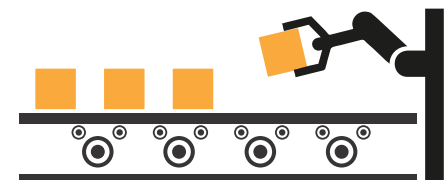

SCALE OF MANUFACTURING

3 Factories

1000+ employees

10+ product lines.

PRODUCT RANGE

Surie Porex products include Diamond Pads, Diamond Abrasives, Silicon Carbide Abrasives, Floor Polishing Machines, Stone Glues, Epoxy Resins, Polyester Resins, Penetrating Sealers, Densifiers, Hardeners, Waxes and Cleaners for Laying, Installation, Polishing, Treatment, Protection and Maintenance of Marble, Granite, Concrete, Terrazzo & Tile.

NETWORK

Surie Porex has an excellent network of sales and distribution in all parts of India and in major countries around the globe for its extensive range of granite, marble, and concrete polishing products. With complete in-house technology, Surie Porex is in a position to adapt to different market requirements.

HOW TO POLISH CONCRETE

SN	PROCEDURE	ITEM CODE	PHOTO	REMARKS
1	Grind the floor with Metal Bond 120 grit. For uneven floors also use 36 and 60 grit.	DSMA C-120		A good level is a prerequisite for good uniform final finish. Improper first grinding will lead to a patchy finish.
2	Grind the floor with Metal Bond 200 grit (Ideal to start with this step on level floors).	DSMA C-200		Minor level differences and the scratches of Metal Bond 200 grit was removed.
3	Grind the floor with Resin Pad 100 grit.	DCRF-7U2 CONC-100		The 100 Resin is used to remove the scratches of Metal Bond 200 grit.
4	Grout the floor to repair pinholes and cracks.	Grout Repair		Grouting is done using a mixture of cement, latex, water and concrete dust from the dust collector.
5	Grind the floor with Resin Pad 200 grit till the floor is scratch free.	DCRF-7U2 CONC-200		This step is essential to ensure no scratches remain after Densification.
6	Apply the Densifier on the concrete floor.	Densi-Hard Lithium Silicate/ Sodium Silicate		Apply with Micro fiber mop and spread uniformly. Apply more in areas where penetration is faster.
7	Grind the floor with Resin Bond 400 grit.	DCRF-7U2 CONC-400		This step will give a nice smooth finish to the floor. A light gloss appears.
8	Polish the floor with Resin Bond 800 grit.	DCRF-7U2 CONC-800		A dull shine will appear but the reflection will be sharp. This is essential for sharp final finish. Color and gloss both increase.
9	Polish the floor with Resin Bond 1500 grit.	DCRF-7U2 CONC-1500		Both color and sharpness improve substantially after this step.
10	Burnishing with Diamond Flexible Pad DCRF 3000.	DCRF-7U2 CONC-3000		Use the Diamond Pad with a High Speed Burnisher. A high gloss will appear after this step. Reflection will be sharp.
11	Apply Stain Protector and burnish with White Pad 4100/ 4200 grit.	White Pad & Stain Protectant		Gives a brilliant high shine and protects the floor from stains.

NOTE: For finest finish ensure scratch-free surface before application of densifier. After Densification scratch removal is very tedious. Level grinding is not a solution for poor casting of concrete floors. SURIE POLEX recommends dry grinding and dry polishing on concrete. A Dust Collector needs to be used in tandem with the Concrete Grinding machine to ensure best results. Densifiers are applied on dry floors. With dry grinding there is no need to arrange for water or remove sludge. Simply empty the dust collector drum. 28 Days curing recommended for concrete floors for best result. Contact us for technical queries.

Today laying of a concrete floor, keeping in mind that flooring constitutes about 25% of the cost of the project, has become very scientific. Very efficient methods have been developed and continue to be developed to obtain a long lasting surface which provides for all material movements without damage to material handling equipment. As the level of robotisation increases, the importance of the concrete floor will increase. So please consult concrete flooring experts before budgeting for your flooring in your Warehouse, Factory or Institution. An initial higher cost will be compensated by major savings over the years.

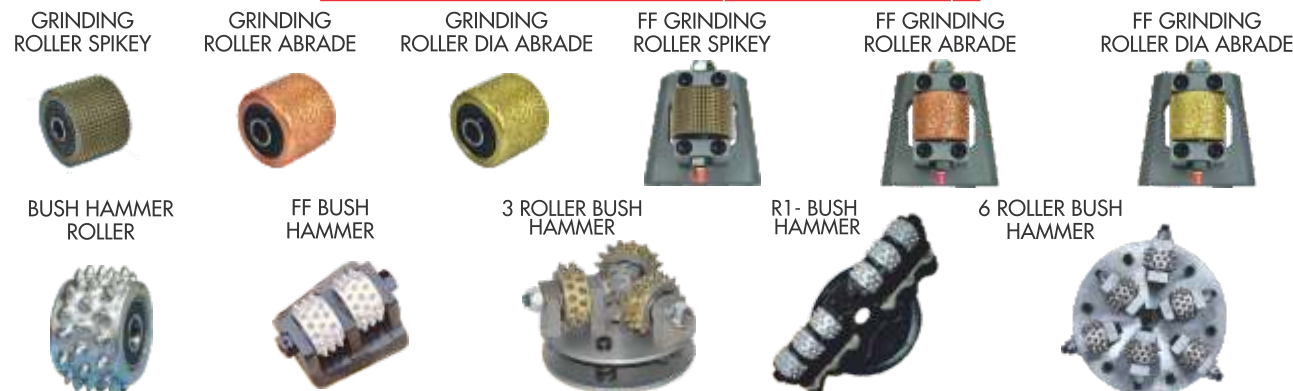

HOW TO DYE & POLISH CONCRETE

SN	PROCEDURE	ITEM CODE	PHOTO	REMARKS
1	Grind the floor with Metal Bond 120 grit. For uneven floors also use 36 and 60 grit.	DSMA C-120		A good level is a prerequisite for good uniform final finish. Improper first grinding will lead to a patchy finish.

MARBLE GLUE TYPES

SOLIDO KRISTAL

Marble glue solido kristal is a thixotropic translucent resin. It can be used for filling, joints & cracks vertical stone surface. Marble glue kristal is the best gel type resin for white base stone like carrara & michael angelo types of stone. It can be mixed with Surie Pox color pigment for matching any stone color.

SOLIDO TRASPARENTE

Marble glue solido trasparente is a honey color stone mastic. It is mainly used for honey onyx and similar stones to maintain translucent effect of stone. The bonding strength of this mastic is much more as compared to other pre-pigmented mastic. After installation. It can be mixed with Surie Pox color pigment to match the color stone.

SOLIDO BIANCO

Marble glue solido bianco is also known as white stone mastic. It is a fast setting marble joint filler and repair resin. Marble glue solido bianco is mainly used for filling joints and big cracks in stone. It can be polished after curing (hardening). It can be mixed with Surie Pox color pigment for matching any stone shade.

SOLIDO CREMA

Marble glue solido crema is also known as beige/cream stone mastic. It is a fast setting marble joint filler and repair resin. Marble glue solido crema is mainly used for filling joints and big cracks in stone. It can be polished after curing (hardening). It can be mixed with Surie Pox color pigment for matching any stone shade.

LIQUIDO BIANCO

Marble glue liquido bianco is also known as white stone mastic. It is a fast setting marble joint filler and repair resin. Marble glue liquido bianco is used for filling fine joints and pinholes in stone. It can be polished after curing (hardening). It can be mixed with Surie Pox color pigment for matching any stone shade.

LIQUIDO CREMA

Marble glue liquido crema is also known as beige/cream stone mastic. It is a fast setting marble joint filler and repair resin. Marble glue liquido crema is mainly used for filling joints and big cracks in stone. It can be polished after curing (hardening). It can be mixed with Surie Pox color pigment for matching any stone shade.

SOLIDO BLACK

Marble glue solido black is also known as black stone mastic. It is a fast setting marble joint filler and repair resin. Marble glue solido black is mainly used for filling joints and big cracks in stone. It can be polished after curing (hardening). It can be mixed with Surie Pox color pigment for matching any stone shade.

MARBLE GLUE CLEAR

Marble glue clear is a thixotropic translucent high viscosity marble glue. It is an ideal glue for joining all types of stones. It can be mixed with Surie Pox color pigment to obtain desired shade to match the color stone. Marble glue can be used on vertical areas for filling cracks, pin holes of the marble.

POLYESTER RESINS

PREMIUM POLYESTER RESIN

Resin T-9 is a premium water clear transparent polyester resin that is used to repair defects in marbles and stones like cracks and pits. It is completely transparent and water clear and is ideal for filling small and big cracks and holes.

TRANSPARENT RESIN

Transparent Resin is a clear low viscosity resin. It is used for filling & glueing of natural stone. It is ideal for fine cracks as well as filling of travertine. You can add a suitable pigment for each & every stone as shown in the color chart below.

AVAILABLE IN 1kg, 5kg & 25kg

PIGMENT PASTE AND SHADES

PIGMENT PASTE

SURIE POLEX Opaque Pigment Pastes are highly concentrated and easy to disperse. It blends well into any type of resin. It can also be used with Marble Glue, Polyester Resin, and Epoxy Resin and it's 50+ Shades are available in 50g & 100g.

AVAILABLE SHADES

Below colours are digital representation, actual colours may vary.

EPOXY RESINS AND GELS

CLEAR EPOXY  PREMIUM TRANSPARENT EPOXY SURIEPOX 1002 is a premium transparent epoxy resin designed to fill cracks and pinholes in marble. It's very low viscosity allows it to penetrate deep and fill very thin cracks. The high bonding power of this epoxy resin ensures long term performance.	ART & GEL EPOXY  SURIEPOX 1020 ART EPOXY SURIEPOX 1020 Art Epoxy Resin is a crystal clear resin system which is specially designed for coating, casting and lamination applications. It is ideal for making river tables, coating wood, resin flow art, geode art, jewellery making etc.
 SURIEPOX 1080 EPOXY RESIN SURIEPOX 1080 is a two component epoxy resin system which is used for closing and filling cracks and larger pores. It hardens quickly. SURIEPOX 1080 is highly penetrative, medium viscosity. It is also used in stone industry for strengthening fissured stone slabs.	 SURIEPOX 5030 EPOXY GEL SURIEPOX 5030 is a Gel Epoxy for joints & cracks. It can be used on joint white and colored marble. It can be mixed with different pigment shades to match the color. Made In India.
 SURIEPOX 1090 EPOXY RESIN SURIEPOX 1090 is a low viscosity clear epoxy resin for filling fine hair lines cracks and pinholes. It comes in 2:1 ratio. It can be mixed with Surie Pox color pigments for matching the color of stones. This water like clear epoxy resin is easy to apply. It penetrates into fine pinholes of marble. It is polishable after it hardens (cures).	 SURIEPOX 5040 EPOXY GEL SURIEPOX 5040 is a Gel Epoxy for joints & cracks. It can be used on joint white and colored marble. It can be mixed with different pigment shades to match the color. Made In Italy.
 SURIEPOX 2004 GRANITE EPOXY SURIEPOX 2004 is a transparent epoxy resin designed to fill cracks and pinholes in granite slabs. It's low viscosity allows it to penetrate deep and fill very thin cracks. The high bonding power of this epoxy resin ensures long term performance.	 COLOR CONVERTERS SURIEPOX Color Converters specially designed to convert the color of granite, marble and stone. It is highly concentrated and easy to disperse. It blends well into epoxy resin and it's 20+ shades are available in 1kg pack.

POLISHING POWDERS, CREAMS AND LIQUIDS

MARBLE, GRANITE & STONE POLISHING POWDERS & LIQUID  SP-9 MARBLE CRYSTALLIZER SP-9 is a high gloss crystallizer that is used for the polishing & maintenance of Marble, Limestone, Terrazzo and other calcareous surfaces. Use with a white pad & any single disc machine. It provides a high gloss and excellent shine.	 GLOEX CREAM It is a water-based cream polish for use on granite, vitrified and porcelain tiles, quartz and silica based floors, green marble and sandstone. It does not contain any wax. It chemically reacts with the floor to produce a brilliant shine. It also seals the pores and prevents accumulation of dust on the surface. Gloex Cream can be used at the end of the floor polishing process to renew old worn out floors and is used directly for regular maintenance.
 MPZ MARBLE CRYSTALLIZER Use for the polishing & maintenance of Marble & Limestone floors. Use with a white pad & any single disc machine. The product provides a high gloss on marble and other calcareous stones. By crystallizing marble floors, they get more wear resistant and the acid sensitivity is reduced. Can also be used to re-crystallize high traffic areas of previously treated floors.	 Z-XTRA POLISHING POWDER This high shine polishing powder protects calcareous natural stone floors (e.g. marble, travertine, limestone) and achieves a mirror-like shine. It reduces water penetrability thus facilitating daily cleaning. It provides the high shine for dull, traffic-worn marble and other calcareous stone floors.
 Z-XTRA PLUS MARBLE CRYSTALLIZER It is a high gloss marble polishing powder that protects calcareous natural stone floors (e.g. marble, travertine, limestone) and achieves a mirror-like shine. It reduces water penetrability thus facilitating daily cleaning. It provides a brilliant high shine to dull, traffic-worn marble and other calcareous stone floors.	 GLAZE-M Use for buffing of all calcareous stones. Used with a red/white pad/woolen felt. The product provides a high gloss on marble/calcareous stones. It is a mild crystallizer and very easy to use for a beginner.
 GLOEX POWDER It is a high gloss polishing powder for marble and other calcium carbonate based stones. It is also use on mosaic/terrazzo. Our most premium offering, it has the best result on all marble floors.	 GLAZEX-G For buffing of all stones. Used with a red/white pad/woolen felt the product provides a high gloss on marble/calcareous/non-calcareous stones. It is not a crystallizer. Can also be used after a increase the sharpness of the polished surface.
 N2-ZX MARBLE CRYSTALLIZER This high shine crystallisation powder protects calcareous natural stone floors (e.g. marble, travertine, limestone) and achieves a mirror-like shine. It reduces water penetrability thus facilitating daily cleaning. It provides the high shine for dull, traffic-worn marble and other calcareous stone floors.	 SP-1 LIQUID CRYSTALLIZER Used for the regular maintenance of marble & limestone floors. Used with a steel wool pad/white pad and a single disc machine. The product provides a high gloss on marble and other calcareous stones. By crystallizing marble floors, they get more wear resistant and the acid sensitivity is reduced. Can also be used to re-crystallize traffic areas of previously treated floors.

STAIN REPELLENT SEALERS

STAINEX

Stainex is a solvent-based, deep penetrating sealer that offers maximum protection against dirt, oil & water based stains on absorbent substrates such as sandstone, concrete, marble, granite, limestone etc. It allows moisture vapor transmission and is UV resistant. It may be used for interior and exterior applications.

STAINEX WB

It is a premium, water-based, deep penetrating sealer that offers maximum protection against dirt, oil & water based stains on absorbent substrates such as sandstone, concrete, marble, granite, limestone etc. It allows moisture vapor transmission and is UV resistant. It may be used for interior and exterior applications.

STONE SEALER

It is a premium solvent based, natural-look penetrating sealer for the protection of natural and artificial stone. The product protects the stone from oil and water based stains, without altering the natural color of the surface. It evaporates immediately allowing the surface to remain as natural as possible.

QUARTZ SEALER

Quartz Sealer is a solvent-based sealer that deeply penetrates engineered quartz and composite stones, providing long-lasting protection against dirt, oil, and water-based stains. It is UV resistant, allows moisture vapour transmission, and requires less frequent reapplications than water-based sealers.

NEW

COLOR ENHANCING SEALERS

ANTIQ

It is an wet look wet-effect treatment to revive the natural color of the stone, for tumbled marble and pebbles which look like they have been bleached. Ideal to improve the look of polished or unpolished stones, to reach desired effect in almost all circumstances. Good protection against all types of dirt and good hydro-oil repellent effect. The product does not turn yellow & has good resistance to wear.

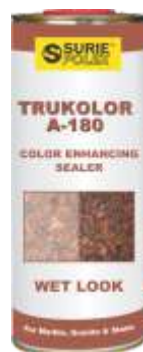

STONE DARKENER

It is a solvent-based color reviving treatment. It is transparent, impregnating and cross-linking for marble, travertine, stones, granite with rough, sandblasted, brushed, flamed or polished finish. Generally applied when the stone is discolored. The product lends an excellent degree of water-repellency as well. The surface thus protected resists for a long time to the aggressive action of acid rains, atmospheric agents and UV rays.

TRUKOLOR

Trukolor is a color enhancing sealer. It intensifies the natural color and structure of stones. It also protects against water and dirt. It has excellent weather resistance and durability. It is suitable for indoor and outdoor use. It allows moisture vapor transmission.

TRUKOLOR A-180

Trukolor A-180 is an economical color enhancing sealer. It intensifies the natural color and structure of stones. It also protects against water and dirt. It has excellent weather resistance and durability. It is suitable for indoor and outdoor use. It allows moisture vapor transmission.

LIQUID SHINER

Ageing Look is a solvent-based, wet-effect color reviver for marble, granite, and other stones. It enhances color, protects against acid rain, weather, and UV rays, and is suitable for all finishes.

WATER REPELLENT SEALERS

BOTTOM SURFACE SEALER PROFESSIONAL SERIES

Bottom Surface Sealer is a specially formulated water based deep penetrating sealer that is applied to the back side of the stone/tile. It prevents moisture and alkali from entering the stone/tile from below. As a result efflorescence and surface discoloration are avoided. It may be used for both interior and exterior application.

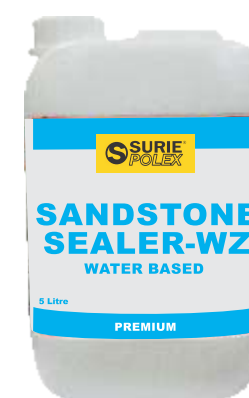

SANDSTONE SEALER-XP

It is a premium, solvent-based deep penetrating sealer that gives excellent water and dirt repellency on absorbent substrates such as sandstone, concrete, travertine, marble, granite, limestone etc. It allows moisture vapor transmission and is UV resistant. It may be used for interior and exterior applications.

BOTTOM SURFACE SEALER

Bottom Surface Sealer is a specially formulated solvent-based deep penetrating sealer that prevents moisture from entering the stone from below after it has been laid. It may be used for interior and exterior application.

SANDSTONE SEALER-WZ

It is a premium, water-based deep penetrating sealer that gives excellent water and dirt repellency on absorbent substrates such as sandstone, concrete, travertine, marble, granite, limestone etc. It allows moisture vapor transmission and is UV resistant. It may be used for interior and exterior applications.

MULTI PURPOSE SEALER

It is an economical, solvent-based, deep penetrating sealer that gives excellent water and dirt repellency on absorbent substrates such as sandstone, concrete, travertine, marble, granite, limestone etc. It allows moisture vapor transmission and is UV resistant. It may be used for interior and exterior applications.

SANDSTONE SEALER-H2O

H2O is an economical, water-based penetrating sealer that gives excellent water and dirt repellency on absorbent substrates such as sandstone, concrete, travertine, marble, granite, limestone etc. It allows moisture vapor transmission and is UV resistant. It may be used for interior and exterior applications.

GROUT SEALER

It is a premium, solvent-based, deep penetrating sealer that offers maximum protection against dirt, oil & water based stains on cement joints for ceramic tiles, vitrified tiles and natural stone. It allows moisture vapor transmission and is UV resistant. It may be used for interior and exterior applications.

STAIN PROTECTOR CONCENTRATE

It is a breathable partly penetrating and partly film-forming sealer for concrete floors that helps to protect surfaces against stains and etching.

MARBLE DENSIFIERS

DENSI-HARD® MARBLE

It is a premium marble densifier. It is a specially formulated water-based liquid that penetrates into the marble and solidifies to make the marble hard and dense. The process of densification makes the marble more durable and abrasion resistant. It doesn't form a film and marble retains its natural look and color. This process is recommended for all types of marble floors.

CONCRETE DENSIFIERS

DENSI-HARD® LITHIUM SILICATE

It is a specially formulated Lithium Silicate densifier that is a deep penetrating product for concrete and terrazzo floors. It helps achieve a hard surface that is easy to grind and polish. Its deep-penetrating, non-soluble characteristics provide longer life and higher reflectivity, helping reduce floor maintenance cost. This environmental friendly treatment reduces efflorescence, improves overall abrasion resistance and reduces dusting. It helps reduce costly wear and damage to diamond abrasives.

MARBLE STAR PLUS

It is a Lithium Silicate based marble hardener. It penetrates into the marble and reacts with the marble to form calcium silicate hydrate which fills the pores of the stone. Not only does this reduce the porosity but also leads to enhanced shine and longevity of polish.

DENSI-HARD® LS+

It is a lithium-based deep penetrating densifier for concrete. It penetrates into the pores of concrete. It increases the abrasion resistance of the surface. It increases the gloss and reflection when polished. It decreases the maintenance cost of concrete floors. It penetrates into the pores of concrete. It increases the abrasion resistance of the surface.

MARBLE STAR

Marble Star densifier penetrates into the marble and reacts with the marble to form compounds which expand and fill the pores in the stone. Densification makes the marble harder and denser. Not only does this reduce the porosity but also leads to enhanced shine and longevity of polish.

DENSI-HARD® SODIUM SILICATE

It is a specially formulated Sodium based shallow penetrating product for concrete and terrazzo floors. It helps achieve a hard surface that is easy to grind and polish. Its shallow-penetrating, non-soluble characteristics provide longer life and higher reflectivity, helping reduce floor maintenance cost. This environmental friendly treatment reduces efflorescence, improves overall abrasion resistance and reduces dusting. It helps reduce costly wear and damage to diamond abrasives.

NEW GLOEX 200 MARBLE DENSIFIER & HARDENER

Specially formulated densifier to be used after DCRF 200 or FB 2M on imported stones. Penetrates deep in the stone given it a harder & denser surface for long lasting polish life.

NEW GLOEX 800 MARBLE DENSIFIER & HARDENER

Deep penetrating fast reacting marble densifier to be used after DCRF 800 or FB 3 Number Special formula that makes stone harder & stronger. Helps improving the final gloss of the stone.

TUFF STONE

Stone Strengthener is a highly penetrating single component product used to solidify absorbent mineral natural stones, mosaic/terrazzo, mineral plaster etc. It is weather resistant and non-yellowing. It does not change the appearance of the surface and allows moisture vapor transmission.

SOLID WAXES / SHINERS

SHINER

This is a high quality wax-based shiner used for polishing edges, moldings & skirtings. It gives high gloss when used with final buff or white pad. Suitable for indoor & outdoor application.

WAX POLISH

This product is a high quality solid wax with exceptional polishing and protective power, due to the extremely high quality of raw materials used in its preparation. It is ideal for final buffing and gives a super-gloss finish. Wax Polish also provides a slight anti-stain and water repellent effect. It is used on stone, wood & furniture.

CREAM WAX

Cream Wax is a high-quality concentrated paste wax for marble, granite, and similar stones. It delivers a super-gloss finish with light anti-stain and water-repellent protection. Suitable for indoor and outdoor use.

LIQUID WAXES

STONE POLISH

It is a premium liquid polishing wax. It is recommended to treat natural stone surfaces. It enhances the brilliant shine look and the natural color of the stones without forming any film. It lets the surface breath avoiding the formation of mould. It can be used on marble, granite, stone & terrazzo.

CERA LIQUIDA

It is a premium liquid polishing wax. It is recommended to treat natural stone surfaces. It enhances the brilliant shine look and the natural color of the stones without forming any film. It lets the surface breath avoiding the formation of mould. It can be used on marble, granite, stone & terrazzo.

LIQUID WAX

It is a liquid polishing wax and color enhancer and is recommended to treat natural stone surfaces. It gives a brilliant shiny effect and it enhances the natural color of the stones without forming any film. It lets the surface breath avoiding the formation of mould.

GLOSS LIQUIDA

Gloss Liquida is a solvent-based liquid shiner used for obtaining high gloss on marble, granite & stone. For best results apply for final buffing with white pad or steel wool. It gives stone an extra protection and gloss. Can be used for indoor and outdoor applications.

ULTRA LUX

It is a Self Polisher and is ideal to polish and rough the natural color of surfaces. It is recommended to polish corners, walls and all those surfaces difficult to polish mechanically. Apart from enhancing the color of the stone it forms a transparent film on it and can also be used on any rough surface for giving it a high gloss.

MOLDING SHINER

It is a high-quality shiner used to renew/enhance the polish of your stone edge, molding, and skirting. Applied with cotton cloth an edge of stone. Suitable for indoor and outdoor applications.

RUST & STAIN REMOVERS

RUST REMOVER

Rust Remover is a ready to use acid-based cleaner that removes rust spots and stains from all acid tolerant hard stones. Special additives reduce the development of rust after treatment. Suitable for polished surfaces.

SCALE REMOVERS

GRANITE TILE CLEANER

Granite tile cleaner is a cement film remover used after the installation of granite or tile on the floor. Granite Tile cleaner removes left over cement grout from the floor. This cleaner retains gloss and shine of the floor without harming the granite or tile.

MARBLE RUST REMOVER

This is a gel formulation created to remove rust spots on stones surfaces, like calcareous stones, marble, granite, ceramic, terra cotta etc. It does not have an acid Ph, hence it is ideal to be applied also on polished stones without the issue of damaging the polished surface and protecting the surface shine. It works quickly absorbing the rust without long applications. It can be used also on metals.

MARBLE & GRANITE SCALE REMOVER

Marble & Granite Scale Remover is formulated using special chemicals that are safe and removes all the stains which are developed due to the hardness of water, which eventually makes the marble & granite turn dull. The cleaner retains the natural look of the stone without affecting the texture of the material.

ORGANIC STAIN REMOVER

Water-based paste designed to remove almost all stains caused by food fats, industrial fats, oils, coffee, etc. from stone materials. It deeply absorbs stains, even the most resistant ones, without affecting the polish of the treated stone without leaving streaks. It can also be used to eliminate traces of salt, saltpeter and humidity.

TAP & TILE SCALE REMOVER

Tap & Tile is a specially formulated cleaner for cleaning tiles, taps, glass, plastic and chrome plated items. Tap & Tile is the best available cleaner for cleaning soap marks and hard water stains from tiles, taps etc. This is a complete washroom cleaning solution. For best results just spray and wipe.

EPOXY GROUT FILM REMOVER

Epoxy Grout Film Remover is a unique product designed for the removal of epoxy grout film from tile, concrete and stone surfaces. It will eliminate most residue left behind after an epoxy grout Film Remover has been used. In addition, Epoxy Grout Film Remover will remove a variety of epoxies, acrylic, shellac, varnish and lacquer.

FIBER NET REMOVER

It is a specially developed cleaner for removing fiber net from the back side of marble and stone slabs before they are laid on the floor.

FLOOR CLEANERS

FLOOR CLEANER NEUTRAL

Floor Cleaner is highly concentrated pH balanced cleaner. Can be used for regular maintenance of marble, granite, stone and tile. Maintains high gloss on floor, can be used with regular mop with scrubbing machine. pH balance ensures no residual effect.

FLOOR CLEANER HEAVY DUTY

Floor Cleaner Heavy Duty is a concentrated oil and grease stain remover. This is a citrus fragrance product which does not contain any harmful chemical, is ideal for the quick and effective cleaning of greasy and oily surfaces.

MARBLE CLEANER

Marble Cleaner is formulated using special chemicals that are safe and removes all the stains which are developed due to the hardness of water, which eventually makes the marble turn dull. The cleaner retains the natural look of the stone without affecting the texture of the material.

FLOOR CLEANER PREMIUM

Floor Cleaner Premium is a pH balanced thick concentrated cleaner, best for Italian and other imported marble and stones. Can be used on daily basis with machine or mop. Has special formulation that maintains high gloss on floor. Suitable for marble, granite, tiles etc.

SPECIAL CLEANERS

TILE & CERAMIC CLEANER

Tile & Ceramic Cleaner is ideal for cleaning tiles and ceramic surfaces. It may also be used on taps, glass, plastic and chrome plated items. Tile & Ceramic Cleaner has a rapid cleaning action and does not require long application periods.

FLOOR SHAMPOO

Floor Shampoo is a specially formulated cleaner with polishing additives that not only cleans marble floors but also increases a nice shine. It can be used at the end of the polishing process to give extra shine to the floor and it can also be used as a daily floor cleaner.

DISH WASHING LIQUID

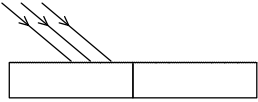

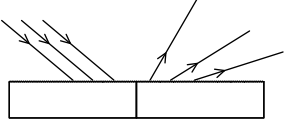

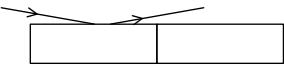

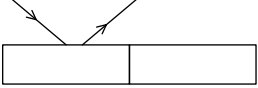

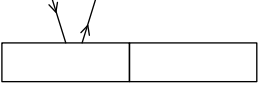

Dishwashing Liquid is a concentrated cleaner for utensils. Its lemon power formulation removes all the stains and dirt from utensils. It smell refreshing and is soft on hands.

LIQUID HAND WASH

Liquid hand wash is formulated with a pleasant fragrance. Its gives a rich lather and is pH balanced for ensuring maximum softness of your hands.

SPECIAL CLEANERS	
 TOILET BOWL CLEANER Say goodbye to toilet bowl rings with Toilet Bowl Cleaner. It has a thick clinging formula to remove tough stains. You can get rid of grime with a simple squeeze of the bottle with its easy grip shape. Toilet bowl cleaner is the best available cleaner to fight with odors.	 OVEN & GRILL CLEANER Oven & Grill cleaner is used for cleaning heavy oil & grease deposits on tiles, granite, & other hard surfaces. This alkaline base cleaner is the best suitable chemical for cleaning oily & sticky floors like of kitchen, service station & other similar areas. Oven & Grill cleaner can also be used for cleaning chimney, ovens etc.
 GLASS CLEANER Glass Cleaner is ideal for quickly removes stains and dirt on windows and electronic appliances. Our product is used to clean TV Screens, Computer Screens, Mirrors, Fridge, and Windows. It offers effective performance and is Non-toxic in nature.	 QUARTZ CLEANER Quartz cleaner is a specially formulated cleaning product designed to effectively and safely clean quartz surfaces. It penetrates into the pores of the quartz surface, lifting dirt and stains without leaving behind streaks or residue. Quartz can accumulate dirt, grime, and stains over time, requiring regular cleaning to keep it looking its best.
 CARPET & UPHOLSTERY CLEANER Carpet & Upholstery Cleaner is a pleasantly scented, concentrated carpet shampoo for intensive cleaning of all types of carpets and upholstery. The consistent dry foam cleans gently yet effectively. Suitable for foam maker machine as well as hand/machine wash.	 QUARTZ SPRAY CLEANER Quartz Spray Cleaners is specifically formulated to remove common household stains, spills, and residues without damaging or dulling the surface of the quartz. It is specially designed with gentle yet effective ingredients that are safe for use on quartz surfaces to prevent etching or dulling of the quartz finish.
 AIR FRESHENER Air Freshener is a water-based air freshener featuring a pleasing floral perfume which deodorizes guestrooms, banquet halls and office rooms. Water-based air freshener does not use ozone-depleting CFC. Extremely economical in use. Do not spray directly on the floor. Spray upward into the center of the room.	 HYGIENIC HARD SURFACE CLEANER CONCENTRATE Hard Surface Cleaner is a specially formulated soap oil that helps to quickly removes stains and dirt and it cleans and sanitizes in one action. Leaves surfaces streak-free. Safe for use on all washable hard surfaces. It's safe on all hard surfaces, 1 Liter makes up to 100 liters of cleaning solution with pleasant room care fragrance.
 TOILET BOWL CLEANER Say goodbye to toilet bowl rings with Toilet Bowl Cleaner. It has a thick clinging formula to remove tough stains. You can get rid of grime with a simple squeeze of the bottle with its easy grip shape. Toilet bowl cleaner is the best available cleaner to fight with odors and kills 99% germs.	 GLASS CLEANER CONCENTRATE Glass Cleaner is ideal for quickly removes stains and dirt on windows and electronic appliances. Our product is used to clean TV Screens, Computer Screens, Mirrors, Fridge, and Windows. It offers effective performance and is non-toxic in nature.

NOTE: WHY DOES STONE REFLECT LIGHT	
Reflection is achieved by polishing surface such that the scratches are appreciably smaller than the wave length of light. If grinding has not created a flat surface, then light will not reflect uniformly and we see white patches on the floor. If grinding is good and polishing is poor the entire surface appears dull (matt finish) and the color of the stone is not fully achieved.	
START BOTTOM SURFACE SEALER: Applied to the bottom of stone before fixing on floor. It prevents moisture entering from below.	 As laid floor surface. With lippage and wavy.
0. LEVEL GRINDING A good level is a prerequisite for good uniform final finish. Improper level will lead to patchy finish.	 Stone appears dull white. No matter which color the Stone is. No reflection.
1. FINE GRINDING Minor level difference and scratches of "0" are removed. Note: Following abrasives do not correct level.	 White shade begins to take on the hue of marble color. No reflection.
1A. RESIN & GLUE For gluing & filling of natural stones.	
2. SMOOTH GRINDING Scratches are very fine. This is the beginning of surface correction.	 Whiteness reduces hue is now closer to marble color. No reflection.
2A. SILICATE HARDENING FOR MARBLE & CONCRETE Penetrates into fine pores of marble, reacts, seals capillaries and increase polish intensity.	2A. NOT REQUIRED FOR GRANITE
2L. SCRATCH FREE GRINDING Use 2L/2K to make every stone visibly scratch-free.	 Color coming close to natural. Reflection only at steep angle.
3. PRE - POLISH Dull shine appears but the reflection is sharp. This is essential for sharp final finish.	 Colour becomes darker. Reflection angle less steep.
4. POLISH Both color and sharpness improve substantially.	 Colour becomes even darker. Reflection angle even less steep.
5. FINE POLISH To the uninitiated this finish would be final finish. Tubelight reflection is clearly visible.	 Colour becomes almost natural. Reflection angle almost vertical.
6. CRYSTALLIZATION FOR MARBLE & LIMESTONE Acid reacts with calcium carbonate of marble to create hard, transparent impervious layer.	6. NOT REQUIRED FOR GRANITE Colour becomes natural. Reflection angle practically vertical.
7. CLEANER FOR MARBLE Buffing with white pad or 6M abrasive to achieve higher gloss. Removes extremely minor orange peel effect because of chemical polish.	7. LUX BUFFING FOR GRANITE Colour remains natural but glossier. Reflection angle vertical.
8. SEALER AS AND WHEN REQUIRED Soaks into finest pores and seals floors. Water will not be absorbed but moisture can escape from the floor

HSG-300 FLOOR GRINDING MACHINE

Motor- 5HP, 3Phase & 5HP, 1Phase
Working Width- 310*550mm
Speed- 100-1500rpm
Weight- 186kg

7.5 HP CONCRETE SCARIFIER MACHINE

Motor- 7.5HP, 3Phase
Drum Width- 200mm
Cutters- 78
Weight- 117kg

FPM 400 FLOOR PREPARATION MACHINE

Motor- 5HP, 3Phase
Working Width- 320mm
Speed- 800rpm
Weight- 150kg

FG 400 FLOOR GRINDER

Motor- 5HP, 3Phase
Working Width- 320mm
Speed- 800rpm
Weight- 110kg

Designs of machines are subject to change without prior notice.

FPM- 330 FLOOR GRINDING MACHINE

Motor- 5HP, 3Phase/4HP, 1Phase
Working Width- 330mm
Speed- 450rpm
Weight- 130kg

EP-200 EDGE POLISHER

Motor- 2HP, 3Phase
Working Width- 200mm
Speed- 720rpm
Weight- 125kg

HSB- 500/430 HIGH SPEED BURNISHER

Motor- 7.5HP, 3Phase/5HP, 1Phase
Working Width- 500/430mm
Speed- 100-1500rpm
Weight- 162/145kg

HIGH SPEED BURNISHER

Motor- 2HP, 1Phase
Working Width- 500mm
Speed- 1500rpm
Weight- 50kg

Designs of machines are subject to change without prior notice.

PLANETARY POLISHING ATTACHMENT FOR RIDE ON TROWELS

Surie Porex's Planetary Trowel Polishing System is designed for polishing concrete with ride-on power trowels and walk behind power trowels and is ideal for use on large industrial and warehousing projects.

MAIN FEATURES OF OUR TROWEL POLISHING SYSTEM

- Speed:** Our system is very fast: You can fully polish 10,000 sqft per day per ride-on power trowel.
- Cost-Effective:** There is no need to buy new machines and equipment. You can use your existing power trowel. All you need is one set of our planetary trowel polishing system and diamond pads.
- Adaptable:** Our Trowel Polishing System is available in various sizes. This allows it to be used with any ride-on power trowel available in the market. Our system will transform your ordinary power trowel into a planetary concrete polishing machine.
- Planetary:** Our planetary plates are installed on the floating pans. They have bearings which allow for a free/passive planetary movement.
- Finishes:** You can achieve various finishes: low, medium or high gloss. You can also achieve various grades of aggregate exposure.
- Easy:** Our system allows for very easy tool changes with our high quality diamond pads. See our "how to polish" chart below.
- Balance:** Our system provides balanced movement and even tool wear.

RIDE ON TROWEL 36" SPRT-236LR LOW RIDER

Model-36" Low Rider
Engine- Honda GX690
Working Dia- 1870mm
Max Speed- 150rpm
Tank: 17L, Weight- 280Kg

PLANETARY TROWEL TOOL HOLDERS & SPARE PARTS

CONCRETE LAYING MACHINES

POWER TROWEL

Model- QJM-1000
Engine Honda- GX160
Working Width- 915mm
Max Speed- 100-140rpm
Weight- 83kg

EDGER TROWEL

Model- 424E
Engine- HONDA GX160
Working Dia- 610mm
Max Speed- 135rpm
Weight- 54kg
