

TECHNICAL DATA SHEET

HSG-500 GEARED GRINDER

High Speed Grinding and Polishing for Large Floor Projects

TECHNICAL SPECIFICATION

FEATURE	VALUE
Motor	10HP, 3Phase
Working Width	480x480mm
Voltage	415V
Frequency	50Hz
Speed	100-1500rpm
Pad Driver	280mmX4
Water Tank	30L
Weight	256kg

DESCRIPTION

With four heads and a strong gear drive this machine has phenomenal grinding power. It has a three phase 10hp motor and a frequency control drive. This is the ideal machine for dry grinding and polishing of concrete floors in large projects. It also has superb productivity on marble and granite floors. Folding handles & separable joint design makes for easy transport. It comes equipped with a vacuum pipe, and is suitable for dust free operation.
